THIS REQUEST FOR INFORMATION IS OFFERED BY: ________________________________
BACKGROUND

The Tucson Police Department is a large agency of approximately 950 sworn officers serving a diverse community of over 600,000. The department is requesting information from vendors who have the ability to manufacture or distribute a predictive policing software system. The department is looking for new technologies and platforms.

For more information about the Tucson Police Department, visit http://cms3.tucsonaz.gov/police. For more information about the Tucson community, visit http://cms3.tucsonaz.gov/

INTRODUCTION

The Tucson Police Department requests information on a Dashboard Application Software System that will help further the department’s mission statement and to meet its needs, as well as those of the community, which are as follows:

1. User friendly interface.
2. No personal data to be displayed and or stored.
3. Accessible on multiple platforms including Windows, Android, and Apple.
4. Provide actionable future crime prediction to include probable locations and times.
5. Utilizes data and analysis considering both short-term and long-term data and trends.
6. Allows user customization of the factors considered in analysis and the ability to adjust the weighting of those factors in the analysis.

REQUEST FOR INFORMATION

Please provide information about your firm’s Dashboard Application Software System, to minimally include the following:

A. Real-time Analytics
   1) Does your application display real-time or near real-time CAD data including police units and events?
      a. Does your application have a Geospatial display module using GPS coordinates that will show the current location of Police units in the field?
      b. Does your application have a Geospatial display module that allows zooming in on a specific event and displaying event information?
      c. Does your application support creating user defined graphical reports using CAD data?
         i. Unit response time.
         ii. Unit activity time.
         iii. Team call activity.

B. RMS Data Mining Features
   1) Does your application have a Geospatial display module that will display persons of interest with parameters defined by the user within a user defined geographic area?
   2) Can your application produce an incident map showing all records related to a record of interest?
      a. Given a name record can your application create a graphical display of known associations?
   3) Does your application have a Geospatial display module that will display current and past events in the form of a heat map?
   4) Does your application have the ability to select data based on both user defined geospatial boundaries and the crime type.
   5) Does your application allow for creating alerts based on user defined areas?
   6) Does your application include a module for Predictive Crime Analysis?
   7) Does your application have a module to create user defined electronic briefing books?
C. Interfaces

1) Does your application interface with Intergraph CAD 9.1.1 SP11 and I/Leads 9.0.0?
2) Can your application collate data from different sources such as the following:
   a. CAD
   b. RMS
   c. Jail records management system (JMS)
   d. License Plate Recognition
   e. Intelligence databases
   f. File archives (Word, PDF, Excel, Powerpoint, RTF, HTML)
   g. Images including mugshots and crime scene photos
   h. Data stored in relational databases (MS SQL, Oracle, IBM DB2, MySQL)
3) Can you define the impact of your application on the performance of the data sources that it pulls data from?
   a. System impact for hardware, software and network.
INSTRUCTIONS TO OFFERORS

1. REQUEST FOR INFORMATION PROCESS:

The Request for Information process is an informal process utilized to gather information which may result in one or more subsequent Requests for Proposal. You are asked to submit the requested information, as instructed below, on or before the due date identified on the Notice page. The information you submit will be reviewed by the City. If a subsequent Request for Proposal document is issued, all parties submitting responses to this RFI will be notified.

2. SUBMITTING INFORMATION:

Please submit information for any products or services which your company provides which would address the Scope of Work. The City is interested in a detailed listing of your products, services, and product features. Your response should include narrative information, marketing brochures, website links, and/or any other method to help the City get an understanding of what you offer.

You are asked to provide 3 copies of your submittal for review. You should also identify a contact representative, along with a phone number and email address.

In lieu of sending in 3 copies of materials, you may send your entire response via email to Lloyd.windle@tucsonaz.gov.

3. INQUIRIES

All inquiries regarding this Request for Information may be addressed to Lloyd.windle@tucsonaz.gov or at (520) 837.4105.

4. PRICE RANGE

Offerors are asked to provide an estimated price or general price range for the product(s) or services identified. Even though the City has not yet defined its needs, please provide as much detail in regards to estimated pricing as possible.

5. PUBLIC RECORD

All submittals received in response to this Request for Information shall become the property of the City and shall become a matter of public record available for review subsequent to the Request for Information Due Date.
